

HP RP5 Retail System, Model 5810

The platform for every retail detail

Get the flexibility and expandability to control everything from the store floor to the back office with the HP RP5 Retail System, Model 5810, an all-around high-performer that stands up to the rigors of a retail environment so you can focus on making sales.

Powered for performance

Use the HP RP5, Model 5810 to excel in even the most demanding environments with your choice of operating systems, 4th generation Intel® Core™ processors,¹ and storage to help you take on every retail challenge.

Customize your perfect fit

Tailor the HP RP5, Model 5810 to your specific needs with maximum port connectivity that supports a wide range of retail peripherals,² and add-ons that deliver true flexibility.

Management and security made easy

POS doesn't need to be complicated. The HP RP5, Model 5810 allows you to enjoy simple, low-cost management with built-in features that help ensure the security of your customer data and terminals.

Trust your hardware

In the demanding world of retail, you can't afford to slow down. The HP RP5, Model 5810 delivers impressive retail-hardened durability and an oversized cooling system to ensure you don't miss a beat.

Environmentally responsible

Reduce cooling and energy costs with the energy-efficient ENERGY STAR® Qualified and EPEAT® Gold registered¹⁹ design that delivers extremely low power consumption. Oversized cooling helps enable the longer lifecycle and delivers more continuous performance in an ambient 40°C environment vs. an average ambient 35°C environment.

Backed by the best

Get deployment flexibility with a five-year product manufacturing lifecycle and award-winning HP service and support. A three-year limited warranty comes standard, and additional coverage up to five years is available with optional HP Care Pack Services.³

- 1 Multi-Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel® architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers, and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel® 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. Intel's numbering is not a measurement of higher performance.
- 2 Optional features sold separately or as add-on features.
- 3 HP Care Pack Services are sold separately. Service levels and response times for HP Care Pack Services may vary depending on your geographic location.
- 4 Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See microsoft.com.
- 5 Not all features are available in all editions of Windows 8.1. Systems may require upgraded and/or separately purchased hardware, drivers and/or software to take full advantage of Windows 8.1 functionality. See microsoft.com.
- 6 Not all features are available in all editions of Windows 7. This system may require upgraded and/or separately purchased hardware to take full advantage of Windows 7 functionality. See microsoft.com/windows/windows-7/ for details.
- 7 This system is preinstalled with Windows 7 Pro software and also comes with a license and media for Windows 8 Pro software. You may only use one version of the Windows software at a time. Switching between versions will require you to uninstall one version and install the other version. You must back up all data (files, photos, etc.) before uninstalling and installing operating systems to avoid loss of your data.
- 8 For systems configured with more than 3 GB of memory and a 32-bit operating system, all memory may not be available due to system resource requirements. Addressing memory above 4 GB requires a 64-bit operating system.
- 9 For hard drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 30 GB (for Windows 8.1) of system disk is reserved for the system recovery software.
- 10 Optical drives are optional or add on features. Duplication of copyrighted material is strictly prohibited. Actual speeds may vary. Double Layer media compatibility will widely vary with some home DVD players and DVD-ROM drives. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 Double Sided-Version 1.0 Media.
- 11 Optional or add-on feature.
- 12 Gigabit ethernet speeds may vary.
- 13 802.11 requires wireless access point and internet service. Availability of public wireless access points limited.
- 14 HD content required to view HD images.
- 15 Integrated Intel HD graphics uses part of the total system memory for video performance. System memory dedicated to video performance is not available for other use by other programs.
- 16 Intel® vPro™ Technology available on models with Intel® Core™ i7 and Intel® Core™ i5 processors.
- 17 Optional optical drive can be replaced with third storage device, limitations may apply.
- 18 HP ProtectTools requires Windows
- 19 EPEAT® registered where applicable. EPEAT registration varies by country. See epeat.net for registration status by country.
